I respectfully urge the the FCC to reject the NAB's petition 04-160. The services that satellite radio provides are innovative and unique. In particular, XM radios instant traffic & weather is a valuable service which should be allowed to continue unhindered by the FCC and commercial stations. I pay for this service and should be allowed to hear everything that XM elects to broadcast. Thank You for your consideration in this important safert matter.F. Thomas Hones
